

# Privacy Policy

Effective Date: July 2, 2024

Simon Gaus ("I") operates the FestivalsApp application (the "Service").

This page informs you about my policies regarding the collection, use and disclosure of personal data when using my Service and the choices associated with that data.

By using the Service, you agree to the collection and use of information in accordance with this policy.

## Type of data collected

### 1. Server log files

The FestivalsApp downloads the festival data from several servers operated by me in Frankfurt, creating server log files, i.e. files in which every request to the server is stored. The requests themselves do not contain any personal data, but the IP address from which the request was made is also stored.

I use the log file data exclusively to ensure the functionality of the service (e.g. error analysis, ensuring system security and protection against misuse) and after the problem has been resolved, after 31 days at the latest, it is deleted or shortened so that no personal reference can be made.

## Data security

The security of your data is very important to me. The server log files are protected from access by third parties through common security practices for the operation of servers and by adhering to best practices.

## Contact me

If you have any questions about this privacy policy, please contact me:

- By email: [simon.cay.gaus@gmail.com](mailto:simon.cay.gaus@gmail.com)
